📁 Projects

PetBucket (Using .NET & React Framework) 🔗
Developed a system named PetBucket.com by using .NET framework and React Js. And MySQL server used for database. In this system, Users can register and login. Pet service holders can also register. Pet Owner can do Pet Sitting, Pet Walking, Pet Day Care and etc. Besides, Admin can see the whole service details and monitor everything. We used 4-layer architecture and solid architecture in the Backend by using .NET Web API.

Bid Buy (Using Java Spring & React Framework) 🔗
A system implemented by using Java Spring Framework and React Js. And as database is MySQL, we used phpmyadmin. And JDBC used to handle database. In this system, Users can register and login. This system is a ecommerce system which can be used for buying and selling products by users will bid for products to buy and seller can sell to highest bidder.

FlyCash (Using Laravel & React Framework) 🔗
Fintech
FlyCash is a financial service in Bangladesh that allows users to make financial transactions through a web application. More than depositing money into user accounts, users can also access a range of services, particularly transferring and receiving money domestically.

Same Project Using Laravel MVC Framework - **CLICK HERE** 🔗
